A
Top five significant ORA terms per model and database
Uraemic calcification · GO BP: positive regulation of cell population proliferation
Uraemic calcification · GO BP: positive regulation of cell migration
Uraemic calcification · GO BP: positive regulation of locomotion
Uraemic calcification · GO BP: positive regulation of cell motility
Uraemic calcification · GO BP: response to wounding
Uraemic calcification · KEGG: Staphylococcus aureus infection
Uraemic calcification · KEGG: Cytoskeleton in muscle cells
Uraemic calcification · KEGG: Integrin signaling
Uraemic calcification · KEGG: ECM-receptor interaction
Uraemic calcification · KEGG: Cell adhesion molecule (CAM) interaction
AAD lesions · GO BP: immune effector process
AAD lesions · GO BP: taxis
AAD lesions · GO BP: leukocyte migration
AAD lesions · GO BP: chemotaxis
AAD lesions · GO BP: response to bacterium
AAD lesions · KEGG: Cytokine-cytokine receptor interaction
AAD lesions · KEGG: Viral protein interaction with cytokine and cytokine receptor
AAD lesions · KEGG: Hematopoietic cell lineage
AAD lesions · KEGG: Cytoskeleton in muscle cells
AAD lesions · KEGG: Neuroactive ligand-receptor interaction
