B
Top ten GO BP ORA terms per model
immune effector process
taxis
leukocyte migration
chemotaxis
response to bacterium
adaptive immune response
cell chemotaxis
positive regulation of cytokine production
regulation of cell activation
regulation of leukocyte activation
positive regulation of cell population proliferation
positive regulation of cell migration
positive regulation of locomotion
positive regulation of cell motility
response to wounding
cell projection morphogenesis
blood vessel development
regulation of anatomical structure morphogenesis
cell morphogenesis
skeletal system development
